

NVD-NVS 7 SERIES OF NIGHT VISION GOGGLES

Battle tested NVD-NVS 7 goggles can address any Military or Law Enforcement ability to observe the terrain under the darkest conditions. The goggles of this model are in service with over 40 militaries throughout the world. The large variety of available models allows the user to choose a variant that would satisfy his particular needs. Waterproof, light-weight, and compact - this advanced system is also the most affordable offer on the world market. NVD-NVS 7-2 standard is the most affordable professional goggles. NVD-NVS 7-2HD provides an unprecedented quality equivalent to 3rd generation models at much lower price. NVD-NVS 7-2WA (Wide Angle) breaks

the common conception of night vision goggles design. No more 'tunnel vision'! By using the advanced 25 mm tube we get 60 degrees Field of View that provides 2.5 times larger spatial angle (58% horizontal x 58% vertical) than a conventional 40 degrees design
